

Pick and choose the formative assessment questions that fit your classroom needs.

What do bugs (otherwise known as micro-organisms) need to sustain their life?

Phosphates are not processed in the wastewater treatment plant. How does a high level of phosphorous create an algae problem in Lake Erie?

Name three ways you can protect our water supply in Monroe County.

Order these numerically from 1 - 7 to show the process of wastewater treatment in Berlin Township.

_____ Berlin Wastewater Treatment Plant

_____ Clean water is deposited into Lake Erie

_____ 1
_____ Sewage

_____ Remove large debris from sewage

_____ Pump Stations

_____ Sediment is removed

_____ Tanks add chemicals which the sediment “settle” at the bottom/top of the clean water
