

Answer the questions below to the best of your ability. Complete the activity individually, small or whole group.

1. Magna TEAM Systems is a “Just in Time” car parts supplier. What do you think that means?
2. How do you think engineers use technology in their job?
3. What is prototyping and why is it important when it comes to manufacturing?
4. In your own words, what is a robot?
5. Why would you use a robot to replace a process that humans can do instead?
6. Why is it important to communicate with other businesses and firms that may be doing the same thing in better, more streamlined ways?
7. Why is important to have a safe workplace when working in manufacturing?
